SMA/SHUIMIN AG

STANDARD MANUFACTURER FOR AMERICA

2026

Quality in Manufacturing.
Excellence in Service!

SMA/SHUIMIN AG

STANDARD MANUFACTURER FOR AMERICA

About Us

Founded in 1999, Standard Manufacturer for America (SMA), also known as Shuimin AG, is a global manufacturing and consulting leader. Headquartered in Milford, Connecticut, SMA provides comprehensive manufacturing services including design, engineering, and production.

Mission And Vision

Our mission is to empower innovation through accessible, efficient, and scalable manufacturing services. We envision a global manufacturing environment driven by quality, integrity, and partnership.

SMA/SHUIMIN AG

STANDARD MANUFACTURER FOR AMERICA

Why SMA?

- Cost Savings: Enhanced lean manufacturing reduces costs by up to 50%.
- Expertise: 2,000+ technical staff support every phase from design through delivery.
- Global Capacity: 35 specialized plants, 300+ shipping agents, and multiple US-based warehouses.
- Quality Assurance: Compliance with strict ISO standards at every process step.
- Fast & Flexible: 24/48h customer response time, and real-time order tracking anywhere.
- Multinational Support: Multilingual teams for seamless technical and after-sale service.

SMA/SHUIMIN AG

STANDARD MANUFACTURER FOR AMERICA

Why can only SMA achieve this?

- Lean manufacturing procedures significantly reduce costs.
- Expert technicians work collaboratively on customer projects.
- Strict adherence to ISO 9001:2000 quality standards.
- Multilingual, multicultural workforce ensures excellent communication and support.
- Web-based management for seamless global collaboration.
- Customer requests answered within 24/48 hours (domestic/international).
- 300+ contracted shipping agents and multiple US warehouses for fast delivery and safety stock.
- Real-time online order tracking available anytime, anywhere.
- Fast, reliable delivery with seamless after-sales care you can trust.

SMA/SHUIMIN AG

STANDARD MANUFACTURER FOR AMERICA

Quality Assurance Protocols

- Certified to ISO 9001:2000/2015 standards
- Lean Manufacturing, Six Sigma, Total Quality Management practices
- Defect tracking and quarterly supplier audits
- 30-day sample review and product validation period

Customer Feedback

Yuri Brigance

5★★★★★

The main thing to note about SMA is that they are headquartered in the USA, which makes communication very clear and robust. SMA helped us build the injection molding & casting tooling to launch our product. They have been very good at ensuring the quality of the parts is perfect. We've now done 2 production runs with them and the 2nd run was very fast, despite some tooling modification that we requested after finding minor flaws in our own design. The RFQ doesn't mention this, but we also did cast tooling + parts, as well as packaging for 2 products with SMA. Our customers have been very happy with the quality, and we're excited to be deepening our relationship with SMA in 2019 to try and get full assembly done overseas. Lastly, the shipping both via air and ocean has been so very well taken care of that the parts arrived right at our doorstep, without having to worry about freight forwarding or anything of that nature. Walter, Kevin, Susan, and Mark have been very pleasant to work with, and I cannot stress enough the value of being able to schedule a time and have a real-time phone conversation with the manufacturer. Thank you MFG and SMA for getting our product to market!

John Stump

5★★★★★

excellent responso

Russell Cereola

5★★★★★

It has been a breeze working with SMA/Shumin AG. My key metric is communication and it has been open and clear. I have already awarded SMA two additional parts and expect to work with them well into the future.

Justin Martin

5★★★★★

Had an issue with the coating not being cleaned before delivery. Outside of that there was great communication, on time and exactly what we wanted. We are doing business again very soon.

STANDARD MANUFACTURER FOR AMERICA

Manufacturing Capabilities & Technologies

- Blow molding, injection molding, and compression molding
- CNC machining, die casting, stamping, forging
- Tooling, surface treatments, and rapid prototyping
- Electro-mechanical systems and electronics development
- Web-based supply chain and logistics tracking systems

Industries Served

- Renewable Energy & Clean Technology
- Industrial Components
- Medical Equipment and Health Tech
- High-End Consumer Products
- Restaurant and Hospitality Devices
